

How does Yenton Primary School support pupils with Special Educational Needs through transition?

We aim to make times of transition as easy as possible for our children who are moving on.

When starting at our school we:

- *Meet with the child and their parents to talk about their needs and answer any questions about our school.*
- *Can meet with staff at the child's previous school or setting.*
- *Can provide the child with a transition booklet that has photographs of the key staff and areas around school.*
- *Read reports from people who have worked with the child.*
- *Can arrange visits to our school so the child gets to see it before they start properly.*

When moving to a new year group we:

- *Introduce the child to their new teacher individually.*
- *Can provide the child with an updated transition booklet that has photographs of the key staff and areas around school to look at during the school holidays.*
- *Talk to the child their family so we can answer any questions they may have about the new year group.*
- *Can give any adults working with the child a Pupil Passport describing the things that help to support them in school.*

Transition

When moving to a new school we:

- *Talk to key staff at the new school about things that help the child to learn well and be happy at school.*
- *Can arrange extra visits to the new school with a member of staff from our school.*
- *Talk to the child and their family so we can answer any questions they may have about their new school.*

If at any stage of the transition you would like to speak to someone please do not hesitate to contact a member of the SENCo team.
